Engineered for your plastic card printing

ENERGY STAR

Ideal for your flexible plastic card printing! TP-9200 is a fast and high performance card printer that offers various options like dual side printing, magnetic stripe, contact and contactless smart card encoding.
TP-9200 saves time with fast printing speed plus a convenient, a 100 card feeder, output hopper and a hand-feed slot conveniently placed at the front of the printer.

USB interface, optional Ethernet and plug & play driver certified by Microsoft ensure that TP-9200 printer can be easily installed and used
Card Designer™ card printing application being provided together with a print driver enables you to create your own ID cards and to connect your printing database easily without having to install any additional software.
